WORK EXPERIENCE

REPAIR TEST ENGINEER 3
August 10, 2010 - Present

LTX Corporation Philippine Branch

Angeles Industrial Park SEZ Calibutbut, Bacolor, Pampanga, Philippines

- Headed the team in generating analytical reports on aging motherboards, achieving a reduction in aging boards to 24%.
- Leads the team in analyzing and repairing defective motherboards, which resulted in 100% on time shipment.
- Provides failure analysis reports to customers.

Projects:

- Created an Excel dashboard for data analysis and weekly tracking of our Aged WIP boards.
- Developed and maintains the MS Access (VBA) database for releasing and requesting components.
- Developed a C++ script that checks the correct data of the firmware.
